```

Option UUID

Options uuid are unique per product-type. even with the same option name uuid will be different on every product-type.

OPTIONS perBooking

One option-uuid/value pair for each perBooking option to be sent in booking payload.

formatRegex is additional helper to be used for validating your forms the same way the check is performed later on BMG side. It uses simple grep notation.

If it is required, when not sent with booking payload, request will be rejected.

One option-uuid/value pair per booking.

"options": {

```

"perBooking": [
  {
    "uuid": "16b60631-3fba-4d19-bade-f718e2c99efa",

    "formatRegex": null,
    "inputType": 6,
    "validFrom": null,
    "validTo": null
  }
]

```

Input type

Base on it, you create right input form

- 1 - list
- 2 - list multiple
- 3 - number
- 4 - string
- 5 - boolean
- 6 - date
- 7 - file
- 8 - image
- 9 - address
- 10 - time
- 11 - datetime
- 12 - string: country
- 13 - string: phone
- 14 - string: flight no

when input type is
1 - list
2 - list multiple
those are option values

One array for each adult, child and senior.

OPTIONS perPax

For each adult, child and senior array containing option-uuid/value pairs to be sent in booking payload.

```

"perPax": [
  [
    {
      "uuid": "0082c3b6-e0d2-4ea8-bb6f-ba1d8ac4b0c",
      "value": "Male"
    },
    {
      "uuid": "d1f293a3-9cef-4c19-aad4-f29373797c76",
      "value": "John Doe"
    },
    {
